PAYMENT BY TEXT MESSAGE

PM ABACUS

Mobile phone

Payment by text message

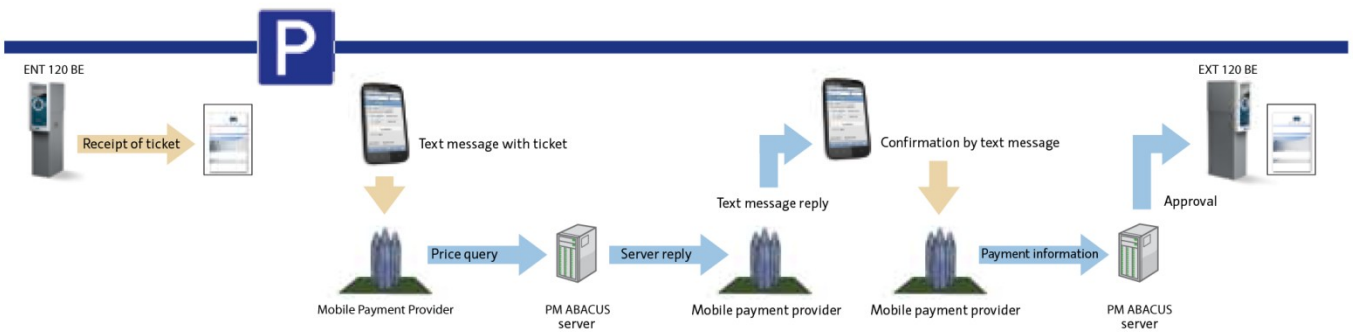
The customer pays by mobile phone without prior registration. With text messaging, there is no need to go to the automatic pay station. Before driving out, the customer simply sends the ticket number by text message to the provider. The parking fee is quickly confirmed, and that's all there is to it. Payment is made with the next telephone bill. The payment service can easily be integrated into existing systems.

Advantages for the operator

- Simple integration into existing systems
- More economical cash management
- Lower service and maintenance costs
- High degree of customer acceptance thanks to easy use
- Quick, reliable payment process
- Billing by mobile payment provider

Advantages for the user

- Direct payment instead of stopping at the automatic pay station
- No waiting in line to pay
- No registration or entry of personal data
- Immediate payment with any mobile phone
- Billing via mobile phone bill or prepaid account



Payment by text message
Mobile phone

Functions/operation

On entering, the customer receives a short-term parker ticket with a shortened serial number

- Before leaving, the customer sends a text message (SMS) with the serial number to a mobile payment provider
- The mobile payment provider sends a price query to the system server
- The system server sends the ticket information to the mobile payment provider
- The mobile payment provider sends a payment confirmation with the fee amount and exit deadline to the mobile phone
- If the exit deadline is exceeded, the customer is informed via text message
- If there is an additional charge, it can be paid by text message
- Payment is via mobile phone bill or prepaid account

Technical details

- PM ABACUS Version x14 or higher
- Special configuration: printing of shortened serial number on short-term parker ticket
- VPN connection between system server and mobile payment provider
- Currently available in:
  Germany, Austria, Croatia, Netherlands
